EDUCATION

M.S. Applied Business Analytics

University of Arkansas

2026 - 2027

M.S. in Computer Science

University of Arkansas

2023 - 2026

B.S. in Computer Science

Minor in Mathematics

University of Arkansas

2018 - 2023

CERTIFICATIONS

Programming Foundations with

JavaScript, HTML and CSS

Duke University

2021

Python Data Structures

University of Michigan

2021

Programming for Everybody

(Getting Started with Python)

University of Michigan

2021

SKILLS

- SQL
- Python
- Java
- Power BI
- Tableau
- JavaScript
- Angular
- NodeJS
- Typescript
- Kotlin
- Unity
- Microsoft Office

LANGUAGES

- English (Fluent)
- Spanish (Fluent)
- Quechua (Intermediate)

WORK EXPERIENCE

Graduate Assistant

University of Arkansas

Aug 2023 - Present

- Graded assignments, exams, and held regular office hours to assist students with questions and reinforce course content.
- Collaborated with professors to ensure consistent grading standards, providing constructive feedback for various classes, including Mobile Programming, Information Security and Cloud Computing and Security.

Software Developer Intern

AssureSoft

May 2022 - July 2022

- Collaborated on a team project to build a full web application from scratch using Git and Scrum ceremonies.
- Developed and tested Angular and NodeJS features to monitor the training progress of new developers.
- Built and tested APIs with CRUD operations and optimized database queries for efficient front-end/back-end integration.

Research Assistant

University of Arkansas

Jan 2019 - May 2020

- Designed and demonstrated a pilot-scale benchtop filtration system for industrial contaminant removal.
- Developed and optimized membrane manufacturing processes for improved filtration efficiency.

Quality Assurance Intern

Saavedra Dairy Enterprises

Jan 2018 - July 2018

- Ensured process metrics adhered to quality and operational standards for continuous improvement.
- Optimized material usage to reduce waste, lower OpEx costs, and yield higher-value products.

PROJECTS

Unity Augmented Reality Campus Guide with GPS & Audio

Spring 2025

- Built a Unity-based AR app that uses GPS-triggered zones to display building descriptions and play directional audio.
- Integrated official university text and audio from the virtual tour for a more authentic user experience.
- Designed and implemented a 3D Razorback mascot that reveals building info and audio controls when tapped.
- Developed a world-space UI panel with scrollable text and play/pause logic using ARCore and custom scripts.

Kotlin-Based Food Map App with Geo-Tagged Reviews

Fall 2022

- Developed a Kotlin-based Android app where users can share food reviews, metrics, and photos.
- Integrated OpenStreetMap API to provide location-based recommendations and address the problem of inaccurate food reviews.
- Secured user data with Firebase Authentication, allowing users to view only their own reviews and those of followed users.
- Enabled data persistence across devices through Firebase Storage and Android Room for seamless user experience.

Route Optimizer for Efficient Campus Navigation

Fall 2022

- Developed a campus routing application in C++ that generates the most efficient route between buildings to facilitate user navigation across campus.
- Implemented efficient searching algorithms including Prim's, Kruskal's, and Dijkstra's, as well as sorting algorithms like merge sort and quick sort, with emphasis on space and time complexity.

Address Lookup System using Binary Search Trees

Spring 2021

- Built a C++ database tool modeled after Acxiom to store and query large-scale address data using binary search trees (BST).
- Parsed and organized thousands of records from an Address.txt file, including house number, street name, city, state, and zip code, simulating real-world data retrieval.

EXTRACURRICULAR ACTIVITIES

Volunteer Experience

- Flood Relief Assistance - Supported a community effort to deliver essentials to families affected by flooding.
- Nursing Home for the Elderly - Organized recreational and support activities to assist elderly residents.
- Reforestation Program - Planted trees along riversides to reduce erosion and promote environmental sustainability.
- Youth Rehabilitation Center - Led fundraising efforts to build an interactive learning center for teens in recovery.
- S.O.S. Orphanage - Led team activities and helped build an outdoor recreational space for children at a local orphanage.

Extracurricular Involvement

- Vice-President, International Bolivian Organization (2019-2021)
- Member, International Bolivian Organization (2018-Present)
- Member, Society of Hispanic Professional Engineers (2018-Present)

Awards and Honors

- F.I.E.S Tuition Scholarship, Foundation for the International Exchange of Students (2019-2021)
- Arkansas Academy of Chemical Engineers Scholarship (2019-2020)
- Top 100 High School Graduates in the State, Universidad Privada Boliviana (2017)
